## GPE, rooted in the past looking ahead to the future.

**GPE was created at the end of the 1970's**, founded by Giorgio Peroni and its focus was mainly in the projection and construction of videogames. GPE entered the American market and positioned itself well at a National and European level. **At the start of the 1990's GPE turned its attention to the vending market.**

**From that moment on the principal objective of GPE has been to create vending machines ad hoc**, following the specific requests of operators in the market:

Now GPE offers a choice of vending machines of various dimensions, capacity

and type: **refrigerated (spirals), hot drinks, hot and cold drinks, machines at 3°C, machines for ice creams and frozen products....**as well as a series of accessories which confirm a great dedication on a functional level.

This Italian Company is always attentive to all requests of customers and always aiming at improving quality, technology and service.

**GPE is present all over the world with international companies or representatives and is synonymous with quality and reliability...all in Italian style!**

A close-up photograph of several chocolate-covered ice cream bars. One bar in the foreground is covered in small, light-colored nuts. In the background, a slice of banana is visible. A semi-transparent red circle is overlaid in the center of the image, containing the word "FROZEN" in white, bold, uppercase letters.
